

# Brazilian E-Commerce Analysis

Analyzing the performance of Brazil's largest e-commerce marketplace to gain insights into sales trends, customer behavior, seller performance, and delivery efficiency.

## Dataset Description

Utilizing Olist E-Commerce Dataset with over 100,000 records spanning 2016 to 2018. The dataset includes information on orders, customers, sellers, products, and logistics.

### Executive Overview

Summary of key performance metrics and sales trends.

### Customer Analysis

Analysis of customer behavior, demographics, and retention.

### Seller Analysis

Examination of seller performance and rankings.

### Sales Performance

Analyzes sales performance across time, geography, and product hierarchy.

### Payment Analysis

Comprehensive view of business payment trends and performance.

### Delivery Performance

Evaluation of shipping times and delivery efficiency.
